DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4-9, 12-13, and 15-18 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Staub et al. discloses the construction of gas cooled end turns for dynamoelectric machine rotor, comprising:

a rotor having a spindle and a body portion, a rotor winding having axially extending coils and end turns defining a plurality of concentric endwindings extending axially beyond at least one end of said body portion; and

at least one, or a plurality of spaceblocks located between adjacent said endwindings so as to define cavities therebetween, said spaceblock having:

first and second sidewalls engaging said adjacent endwindings,

an upstream wall, and

a downstream wall.

Aiba teach the construction of stators of dynamoelectric machines having short outer spacer blocks with a non-planar contour for the purpose of creating a pressure difference at the inlet and outlet portions of the channel caused by the difference in the gas flow speed.

The prior art of record, taken alone or in combination, fails to teach the construction of a gas cooled dynamoelectric machine as described on independent claims 1 and 9, comprising:

at least one spaceblock located between adjacent endwindings so as to define cavities therebetween, said spaceblock having first and second side walls engaging said

adjacent endwindings, an upstream wall, and a downstream wall, said downstream wall of said spaceblock having a non-planar contour;

wherein said downstream wall has a re-entrant contour to enhance rotating cavity cooling flow; and

wherein said downstream wall is defined as a generally part circular concave curve.

Dependent claims 1-8, 12-13, and 15-18 are considered allowable by their respective dependence on allowed independent claims 1 and 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
